* In order to report enrollment based on course location, a redistribution of headcount was made in Fall 2003. Breakdown by campus/location above the solid line is based on student campus code; below the solid line, on course location. Students enrolled in web courses alone are generally included under the home campus of the instructor. Refer to table 2.1.1 (Part 2) for a detailed breakout of the new location categories.

** Beginning 2003, **Klamath** includes OIT/Klamath Falls campus, high school transition, remedial courses, KCC and other continuing education; **Portland** includes Metro & CAPITAL Centers, OHSU Allied Partnership Programs and Ft. Lewis; and **Other** includes Boeing, high school ACP, and outreach classes. Prior to 2003, the OHSU Allied Partnership Programs were reported under Klamath.

*** An on site industry program in the Seattle area was established in 1998 and administered through the Portland campus (note the increase in headcount and FTE). Beginning Fall 1999, the Klamath campus oversees the program and and through 2002, is credited with headcount and FTE generated by these students.
