\* In Fall 2003, the number of high school Advanced College Placement students grew by 119 which resulted in a large increase in students aged 18 and under.

\*\* Beginning Fall 2003, average age will be calculated based on the exact age of students (years and days). Averages for 1999 through 2002 shown here are based on this new methodology and will differ from previous editions of the Fact Book.
