

## **OIT – PORTLAND OPERATIONS**

Established in 1983, the Oregon Institute of Technology in Portland offers bachelor's degrees in selected technologies, workshops, seminars, short courses and contract/customized training for individuals and companies in the upper Willamette Valley. The six degree programs currently offered are Electronics Engineering Technology, Industrial Management, Information Technology, Management Information Systems, Manufacturing Engineering Technology, and Software Engineering Technology. Professional development offerings and contract training can be provided for any of the technical or professional areas for which the college has resources and expertise.

With a focus on serving working adult students, most courses are offered on an extended day schedule. All courses are taught by OIT faculty members, both full-time and industry professionals serving as adjuncts, and credit offerings directly parallel the courses offered at the Klamath Falls campus. Most general education courses required in the degree programs are offered in cooperation by Eastern Oregon University, Portland State University and regional community colleges. Classes are held at OIT's two Portland campuses, the Metro Center and the CAPITAL Center, at various community colleges and at selected industrial facilities.

OIT Metro Center  
7726 S.E. Harmony Rd.  
Portland, OR 97222

OIT CAPITAL Center  
18640 NW Walker Rd.  
Beaverton, OR 97006
